Resumo

Como fazer isso, por favor consulte [light led](#) and [how to connect cubieboard and arduino](#)

Diagramas Esquemáticos

Source Code

```
#include <Stepper.h>

#define STEPS 100

Stepper stepper(STEPS, 8, 9, 10, 11);

int previous = 0;

void setup()
{
    stepper.setSpeed(90);
}

void loop()
{
    int val = analogRead(0);

    stepper.step(val - previous);

    previous = val;
}
```
